

ACE ANALYZER / QUICK GUIDE

Analyze ACE ES-003 data

Upload an ACE report, review and document findings, and export results for follow-up.

TIME

About 10-15 minutes, plus processing time

YOU'LL NEED

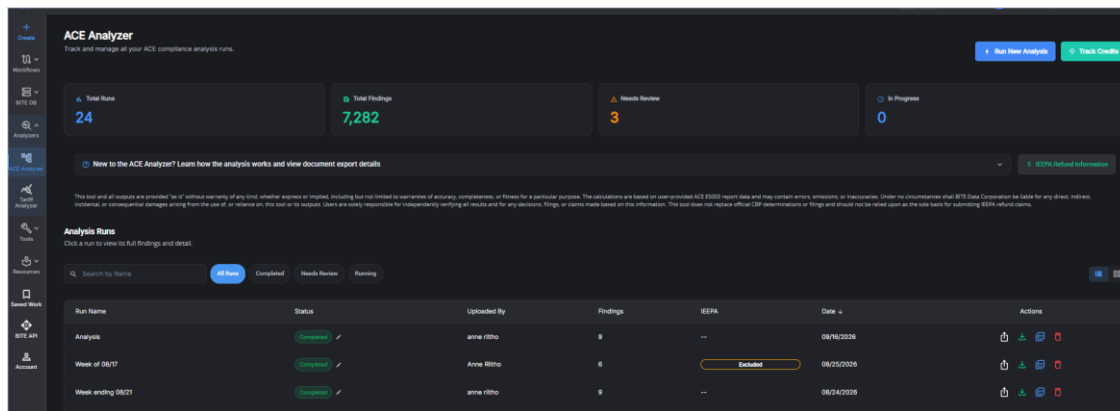

ACE Analyzer access and a current supported report

Before you begin

- Export the ACE ES-003 report, or another supported equivalent export, that you want to review.
- Confirm that you are working in the correct BITE team or account.
- Know the date range and importer activity covered by the report.

1. Open ACE Analyzer

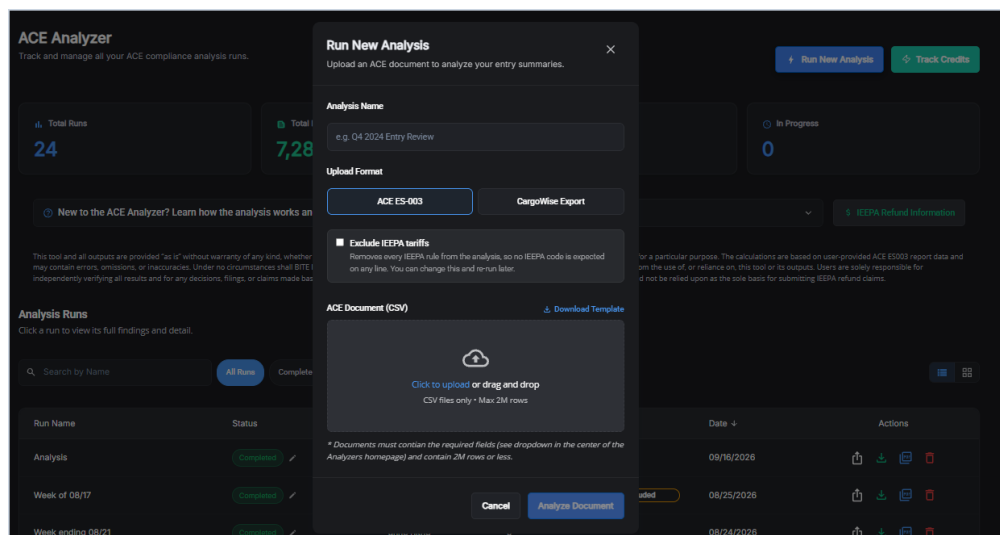

Sign in to BITE and select Analyzers and then ACE Analyzer in the lefthand bar menu.

Open Analyzers in the left navigation, then select ACE Analyzer.

2. Upload the report

Select “Run New Analysis” in the upper righthand corner. A pop up will appear; add a name for this Analysis (all runs will store in Bite) and upload or drag and drop the supported report. Once uploaded, click “Analyze Document”.

Name the analysis, select the report format, and upload the ACE report.

3. Wait for processing to finish

Keep the Ace Analyzer page open, or return later. Once the Analysis has completed running, it will indicate that processing is complete.

Review and prioritize findings

Start with the report summary, then narrow the results to the entries that require attention.

4. Open the completed report

Select the Analysis Run to review. In this screen, the Analysis will show summary findings (line items, findings, total value and total duty), as well as a table with each entry line item and analysis results.

5. Filter the findings

To streamline review, use the available filters to focus on matched findings, a specific flag type, or another review priority.

ENTRY #	LN	ENTRY DATE	IMPORTER	HTS	DESCRIPTION	COO	SPI	VALUE	DUTY	FLAGS

Apply tariff, discrepancy, and country filters to focus the review.

Common findings

FINDING	WHAT IT MEANS	WHAT TO REVIEW
Tariff ordering	Tariffs appear in a sequence that differs from expected treatment.	Review the sequence and duty calculation.
Missing Chapter 99	A required additional tariff provision may be missing.	Confirm applicability and add the code if required.
Unexpected Chapter 99	A reported provision differs from expected treatment.	Confirm whether the reported code applies.
Possible AD/CVD	An applicable case may be missing from the entry data.	Determine whether a case applies and verify the case number.
Missing tariff quantity	A quantity needed to evaluate or calculate duty is missing.	Confirm and supply the required quantity.
Unmatched entry	The Analyzer could not fully evaluate the entry automatically.	Review it manually using the appropriate reference tools.
Tariff tool review	The correct treatment depends on information not available in the report.	Review the product and tariff treatment in BITE.
Base duty discrepancy	Calculated base duty differs from the amount reported as paid.	Recalculate and investigate the difference.

FINDING	WHAT IT MEANS	WHAT TO REVIEW
REVIEW NOTE A finding identifies an item for review. Apply your organization's compliance procedures before making a correction or disposition.		

Investigate and document results

Use the entry-level detail to understand the issue, record the decision, and preserve a review trail.

6. Open an individual finding

Select a flagged entry or line to view the reported information, BITE's expected result, and the explanation for the finding.

7. Compare the reported and expected values

Confirm the affected entry and line, then investigate the underlying classification, tariff treatment, quantity, or duty calculation.

8. Record the decision

Add a comment when documenting a finding or its disposition. Comments identify who recorded the note and when it was added.

9. Clear or restore findings

Clear a finding after completing the review. Work by finding type when using bulk actions, and restore a finding if additional review is required.

LINE ITEM DETAILS

Importer	Cascade Fluidics Corp
HTS	8413600090
Description	rot pos displa pumps oth, nspf
Country of Origin	JP
FTA (SP)	--
Entry Date	04/04/2025
Value	\$3,905.00
Duty Paid	\$292.88
Base Duty Paid	\$0.00
MPF	\$13.53
HMF	\$0.00

APPLIED TARIFFS

#	Type	HTS	Description	Duty
1	Section 301	99038815	--	\$292.88

FLAGS ON THIS LINE

Unexpected Ch. 99

WHAT WE DETECTED

Unexpected Ch. 99: Claimed 99038815 but not expected. Clear

RECOMMENDED ACTIONS

- Review the original commercial invoice to verify country of origin and declared values.
- Confirm HTS classification and applicable Chapter 99 provisions with your customs broker.
- If an error is confirmed, consider filing a Post Summary Correction (PSC).

NOTES & COMMENTS

No notes added yet.

Add a note about this line...

➤

➤ Send to Broker

Clear All Findings

Mark as Cleared

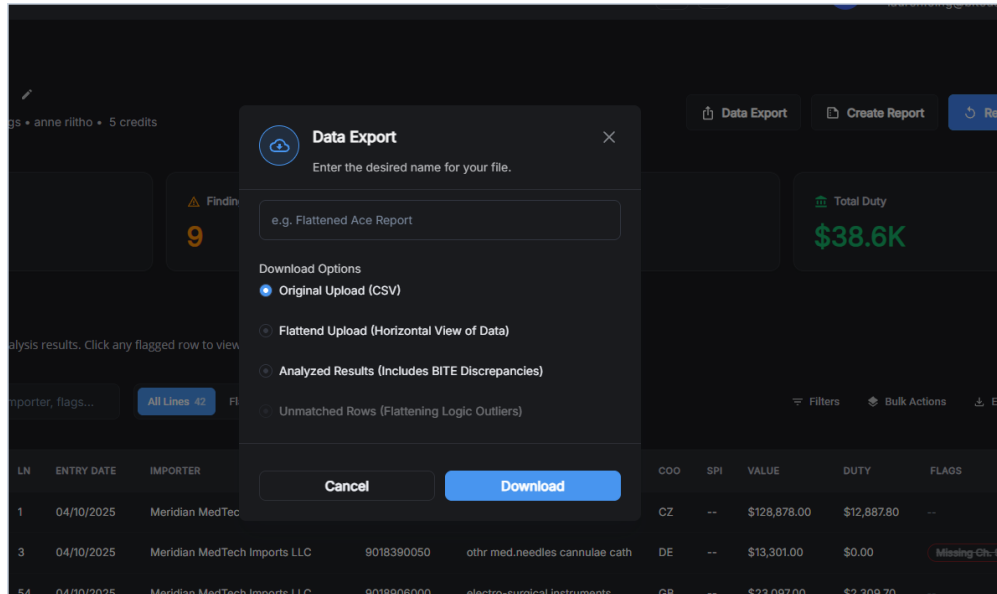

Review the line details, expected treatment, recommended actions, comments, and disposition controls.

USE BULK ACTIONS CAREFULLY Clear findings by category only after reviewing the affected entries. Avoid clearing all findings when some categories have not yet been assessed.

Export results

10. Data Export

Select “Data Export” in the top right to download the results.

Choose the export format that matches the next step in your review.

11. Choose the appropriate output

Select the view or report that matches the work your team needs to complete next.

OUTPUT	BEST USED FOR
Original Upload	The original upload for comparison.
Flattened ES-003	A consolidated view that places related entry information together so the full entry is easier to scan.
Analyzed Results	A focused list of findings and actions (including BITE discrepancies) for analysts working through a review queue.

12. Create a Report

In addition to export data, users can create a report, including an IEEPA report or a BITE report, which summarizes findings produce by the ACE Analyzer for the period. To create a report, click on “Create Report” in the upper right-hand corner and select the output to download.

What happens next

Use the findings to investigate discrepancies internally, coordinate with a customs broker, or support post-entry correction and recovery analysis. For refund-focused work, continue to the IEEPA Refund Report Generator on the ACE Analyzer wiki.
